

Take your AI solutions to the next step

What value can a high performing AI environment bring to your solution?

Artificial intelligence (AI) is becoming a reality for companies of all sizes. If you are an AI developing company or helping clients to implement new solutions you now have the opportunity to test what value an AI environment, based on state of the art technology, can bring to your solutions.

Your test system is already set up at the Pedab Demo Center in the south of Sweden. The best performing AI server, with NVIDIA GPU accelerators, along with preinstalled deep learning frameworks.

Welcome to Pedab Community

In addition to the environment itself, we can make the Pedab Community available for you. This means that Pedab will create a community where you can get access to skills to help you succeed in your project. The Pedab Community helps you get as much out of the test as possible, but are also there for you going forward, after the test.

Practical facts

With a VPN Connection and a user ID, you do the test conveniently from your own office, or from wherever you like. The duration of the test period and other practical details are agreed before the test starts. A test period is usually between 2 and 4 weeks. There is no cost for the test for you.

Contact Us

Now is the right time to take the first step to test your ideas. Please contact your local Pedab contact or Jonas Vallin, VP of Infrastructure, Pedab Group, jonas.vallin@pedab.se.

Technical specifications

- IBM Power System 822LC, 256Gb memory
- NVIDIA Tesla P100
- Ubuntu 16.04 LTS
- Deep Learning frameworks and supporting software libraries through PowerAI
- Docker/Nvidia-docker, version 17.06.1-ce
- Containerized DL-Frameworks: Caffe och Tensorflow

Pedab Demo Center is located in Borås, Sweden. The Demo Center provides pre-installed environments ready for tests, as well as access to our Pedab community with competent and resourceful partners and vendors. Pedab is a distributor of IT infrastructure and software solutions, launched in 1993. We create sustainable value together with our extensive eco system of vendors, partners, and resellers. We distribute leading vendors like IBM, Huawei, SAP, Informatica, and Supermicro.
